OKLAHOMA STATE TREASURER

MONTHLY INVESTMENT
PERFORMANCE REPORT

MAY 2009

SCOTT MEACHAM
OKLAHOMA STATE TREASURER

June 8, 2009

To the People of Oklahoma:

I am pleased to issue the May monthly investment performance report for the Office of the State Treasurer. I trust you will find it thorough and in keeping with my commitment to provide full and complete disclosure of all activities within my office. As always, my staff and I are available to answer any questions you might have.

Market Conditions

Yields on U.S. Treasury securities from two years to 30 years continued to increase during May. The 10-year note climbed 30 basis points to 3.46% and the 30-year bond rose 27 basis points to 4.34%. At month-end equities rallied worldwide after reports showed industrial production in Japan increased the most since 1953 and India's economy expanded faster than estimated. Commodity prices were driven higher and the dollar weakened. The Standard & Poor's 500-stock index was up 25% since the end of February. The Dow Jones Industrial Average closed at 8,500, up 20% and the Nasdaq composite index soared 29% in the last three months.

Economic Developments

The Institute for Supply Management reported that its index of manufacturing activity rose to 40.1 for April, up from 36.3 in March. The Labor Department reported April headline unemployment rose to 8.9% from 8.5% in March. The total number of jobs lost since the beginning of the recession in 2007 rose to 5.7 million. The average workweek remained unchanged at 33.2 hours, and average hourly earnings rose 0.1% from the prior month. The producer price index (PPI) for finished goods rose more than forecast by 0.3% in April, but was still 3.7% lower than a year ago. Retail sales fell 0.4% in April for a second consecutive month. The March number was revised to a drop of 1.3%. The decline in sales was led by falling demand in electronics, furniture, clothing and grocery stores. The consumer price index (CPI) was unchanged in April. The core CPI which excludes food and energy prices jumped 0.3% in April. A 9.3% increase in tobacco prices generated almost 40% of the core CPI increase as a federal excise tax kicked in. The Commerce Department released information that the U.S. trade gap widened modestly in March to \$27.6 billion from \$26.0 billion in February. The trade deficit had been shrinking for the past eight months as U.S. exports remained healthy even as demand for foreign goods continued to decline. The Conference Board's consumer confidence index surged to 54.9 from 40.8 in April. U.S. gross domestic product (GDP), the broadest measure of output, contracted at a revised 5.7% annual rate in the first quarter. The first quarter decline combined with the 6.3% contraction in the fourth quarter is still the worst back-to-back GDP decline in six decades. The first quarter report on home prices released by the National Association of Realtors reported the median home price for U.S. metropolitan areas posted a 13.8% decline from a year ago reaching, \$169,000.

Portfolio Commentary: Performance, Diversification, and Strategy

Yield on the Treasurer's portfolio was 3.36% in May and the weighted average maturity was 485 days. There were no significant changes in asset weightings. Continuing to decline, the year-to-date monthly average investable base fell \$24 million to \$3.885 billion. Since February the base number is down almost \$90 million. Portfolio diversification continues to be sound. U.S. Treasuries represented 8% of holdings, and U.S. government sponsored enterprises accounted for approximately 42%. Mortgage-backed securities were 20%, Municipal Bonds were 1% and Certificates of Deposit represented 6% of assets. Money market mutual funds were 8%, and 11% was maintained in overnight repurchase agreements. Link deposits (at less than 1%), State Bond Issues (at 3%) and foreign bonds (at less than 1%) made up the balance of funds invested. In keeping with the State's statutory investment objectives, the portfolio strategy continues to seek safety, liquidity, and return on investment, in that order. Based on market conditions, portfolio strategy will consist of a combination of laddered maturities and market observation for investment opportunities.

Collateralization

All funds under the control of this office requiring collateralization were so secured at rates ranging from 102% to 110%, depending on the type of investment.

Payments, Fees, and Commissions

All securities were purchased or sold on a net basis utilizing competitive bidding where practicable, with no additional fees or commissions known to the State Treasurer. Bank fees, mutual fund operating expenses and fees charged by JPMorgan Chase for the Tri-Party Repurchase Agreement Program are detailed in the attached pages, as is the earnings split between the Treasurer and the master custodian bank on securities lending income.

Sincerely,

SCOTT MEACHAM, STATE TREASURER
SECRETARY OF FINANCE AND REVENUE

Explanation of Performance Comparison

May 31, 2009

The following page presents market rates of return on the Securities portion of the General Account and of the State's aggregated State Agency Accounts. The figures, which are dollar- and time-weighted, where appropriate, are calculated using the percentage change in market value (inclusive of accrued income) from the end of the prior month to the end of the reporting month. To ensure the integrity of the data, this information is provided by the Treasurer's custodian bank acting in its capacity as an external third party. As such, performance measurement is presently confined to those investments which are custodied at Northern Trust ("Northern").

The Treasurer's office is trying to develop a method to report rates of return on all investment instruments in the State's portfolio. This is in an effort to report return data in a manner recommended on September 15, 1994, by the Working Group of the Cash Management and Investment Oversight Commission. However, there are technical and conceptual challenges to expanding performance measurement to other portions of the portfolio. Attempting to apply market-base pricing calculations to instruments which do not trade, such as Certificates of Deposit, presents difficulty which is both conceptual and technical in nature.

Benchmark data is also provided on the following page.
